

WinGD and Wärtsilä clarify customer support cooperation

Swiss marine power company WinGD reaffirmed its commitment to provide reliable lifecycle support for its two-stroke engines through a global network. Global Service by WinGD, launched earlier this year, provides expert technical assistance, field service, and dependable maintenance worldwide, supporting operators through retrofit solutions, performance assurance, and efficiency optimisation.

As part of the extended network, Wärtsilä Services Switzerland Ltd remains an Authorised Global Service Provider for WinGD two-stroke engines, continuing to provide access to an extensive international network and technical resources wherever vessels operate. This cooperation ensures that WinGD-powered vessels benefit from a choice of trusted providers to deliver on reliability, safety, and efficiency, regardless of location.

Global Service by WinGD combines in-house technical expertise with the reach of a global service network to deliver flexibility and choice for operators, which is supported by certified parts and verified technical procedures. This approach ensures that customers can rely on consistent quality, while adapting their operations to shifting commercial and regulatory demands.

WinGD in brief

WinGD advances the decarbonisation of marine transportation through sustainable energy systems using the most advanced technologies in emissions reduction, fuel efficiency, hybridisation and digital optimisation. With their two-stroke low-speed engines at the heart of the power equation, WinGD sets the industry standard for reliability, safety, efficiency, and environmental design - supported by Global Service by WinGD or authorised service partner Wärtsilä, which delivers tailored 24X7 lifecycle engine support through Swiss engineering excellence, dependable maintenance, rapid global response, and genuine parts to keep engines performing at their best.

Headquartered in Winterthur, Switzerland since its origin as the Sulzer Diesel Engine business in 1893, today it is powering the transformation to a sustainable future.
